

X-Shaped Table Topper Instructions:

After having your 2 piece X-Shaped Table Topper printed on cardstock and cut out, place both pieces in front of you right side up. There should be a slit marked with a dotted line on each piece in the center, one coming from the top of the piece and the other from the bottom.

Cut along the dotted lines being careful not to cut all the way to the other side. Take each piece in a different hand, holding the piece with a bottom slit above the other. Make an "X" with the pieces, and slide them together using the slits until they lock into place. Display your Table Topper at your event with pride.
